ISMF INTEGRATED SAFETY MONITORING FILTER

ADVANTAGES

- Lower need for additional make-up air
- Improves overall filtration efficiency of the dust collector
- Independently tested flame barrier
- Allows recirculation of cleaned process air with a high degree of safety
- By returning the air energy costs are reduced

Application	An ISMF filter works as flame barrier for ST1 metal dust and up to ST2 for organic dust.
Installation Options	 ISMF filters can be configured to Camfil's Gold Series or Gold Series X-Flo dry dust collectors. Due to Camfil's modular concept, ISMF filters can be retrofitted to existing units.
